

ENERGY DATA × AI

Turning electricity data into meaningful action.

Informetis Europe

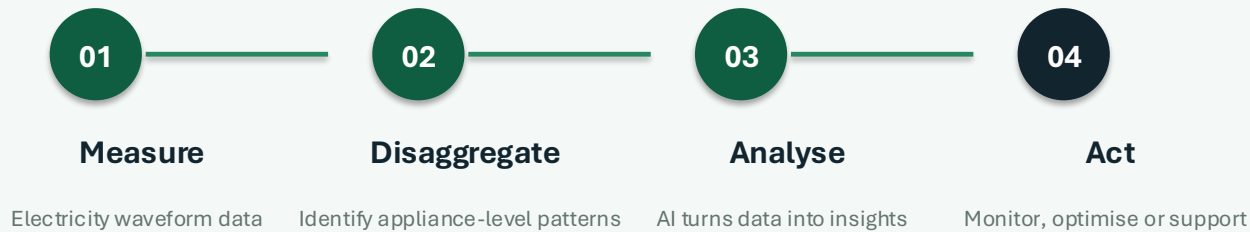

AI-powered energy intelligence for Europe
— from Cambridge to real-world applications.

NILM • Energy Management • Assisted Living

One core technology. Multiple applications.

We measure electricity, disaggregate the signal, and turn it into useful insight.

FROM SIGNAL TO INSIGHT

NILM — Non-Intrusive Load Monitoring

Smart Sensor

WHERE WE CREATE VALUE

SMART ENERGY

Energy management

Monitoring • Optimization • Demand response

HEALTH & SOCIAL CARE

Privacy-first assisted living

Routine monitoring • Alerts • Peace of mind

Make hidden energy behaviour visible — without adding friction.

Our platform combines appliance-level insight, privacy-conscious monitoring and partner-ready integration.

01

Privacy first

Monitor routines and activity without cameras or wearable devices.

02

Actionable insight

Disaggregate total electricity use into appliance-level patterns and activities.

03

Built for partners

Scalable cloud platform, APIs and flexible customisation for partner systems.

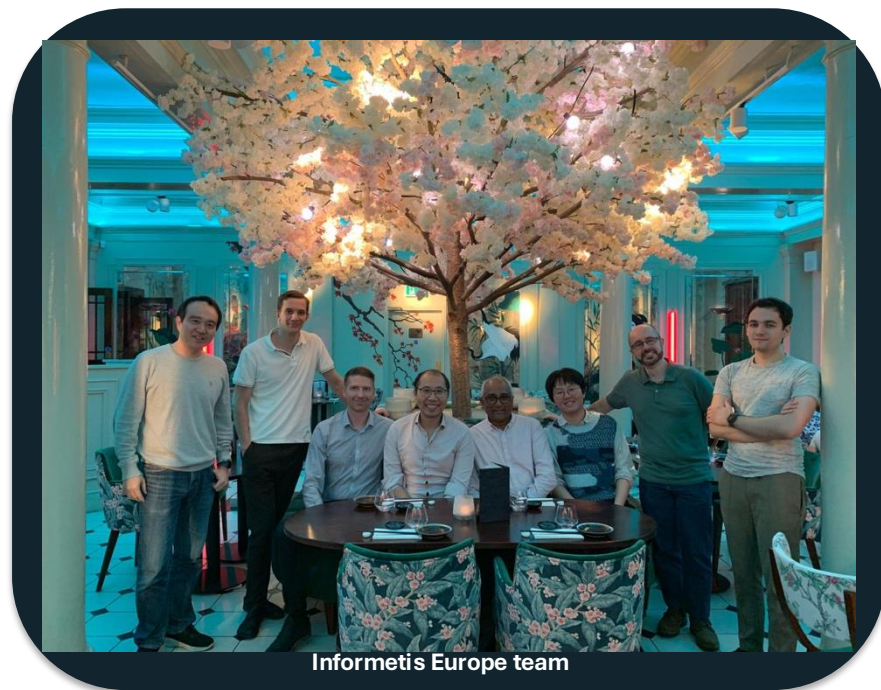

Cambridge R&D • Daikin Europe cooperation • Redbridge pilot • Commercial deployments

Example: HomeView — appliance-level energy insight

A Cambridge-based European technology hub within the Informetis Group.

Informetis Europe develops and commercializes AI-enabled energy solutions for the European market.

**COMPANY**

Informetis Europe Ltd.

BASE

Cambridge, United Kingdom
